POWER GRID RESILIENCE

March 23 – 25th, 2015 • Washington, D.C.

Welcome to the 2nd Annual Power Grid Resilience

We're looking forward to welcoming you next spring in Washington, D.C!

In an effort to make your stay with us as enjoyable as possible, we've put together a visitor's guide to the city that we hope will interest you.

Why Washington?

We're living in an era of severe weather, unprecedented physical threats and unrelenting cyber incursions. This has placed an increased pressure and focus on the resilience of the U.S. power grid and U.S. utilities face a web of state and federal compliance frameworks, public pressure on everything from rate spikes to terrorist threats to emergency preparedness, and a critical need to replace aging infrastructure while ensuring a robust, resilient and secure grid.

These federal compliance issues and the need to protect and harden the grid are why we chose our nation's backyard to host Power Grid Resilience.

But, all work makes for dull events. That's why we've compiled a list of the top places to eat, see and visit while you're spending out time with us. Also, take a peek at all the amenities on offer from the Westin Crystal City.

This 2nd Annual event will bring together top utility executives to share best practices with respect to immediate implementation of near-term and relatively low-cost steps to make our arid significantly more resilient.

See you soon!

Power Grid Resilience Team

"We need a robust dialogue about what needs to be done, to ensure that we're moving forward in a very positive direction to protect these critical assets that have such an essential part to play in our overall economic infrastructure in this country. Ultimately, we want to protect this country, we want to protect the grid, but we want to also do it in the most cost-effective way possible."

Jon Wellinchoff
Former Chairman
**Federal Energy
Regulatory
Commission (FERC)**
